

# Device buyback program

## Agilis sheaths

As the leader in medical device reprocessing and remanufacturing, Stryker's Sustainability Solutions provides opportunities through our buyback program to help maximize your financial and environmental savings. To supplement these savings, we are pleased to offer a buyback program for select devices including the Agilis introducer sheath.

### How does the program work?

For customers not reprocessing Agilis sheaths, we offer a buyback program for the following item numbers: **408309, 408310, G408324.**

**Collections:** We provide collection materials and instructions for proper handling and shipment.

**Device eligibility:** Both the introducer sheath and dilator must be included for the eligible item numbers above to be accepted.

**Payment:** Payments will be calculated and paid quarterly. You will receive a summary report for each quarter and can choose to receive reprocessing credit or a check for payment.

**Pricing:** Contact your local Sustainability Solutions representative for pricing and buyback agreement information.

**Call 888 888 3433 or go to [sustainability.stryker.com](https://sustainability.stryker.com) for more information.**
